### Youth Party asks FG To Avert NLC Strike

The Youth Party has noted with dismay the unserious approach that the APC led Government has adopted to providing palliative to the severe economic impact of the removal of the fuel subsidy on the masses. The Government has applied a slow as well as an unserious cosmetic “rice sharing” approach to a situation that demands a robust sustainable economic way forward. ## Book Review

### **The Origins of Political Order by Francis Fukuyama.**

Reviewed by Ajibade Olasumbo

The Origins of Political Order provides an account of political development from pre-human times to the French and American revolutions, the emergence of modern States beginning from ancient China in the era of warring states, to the Ottoman state, medieval Europe and early Modern England. It is also research on comparative political history.

Fukuyama proves a great understanding of historical determinism-history is past politics and today's politics will become tomorrow's history. He posits that modern institutions did not just evolve overnight but were built on pre-existing institutions, and understanding the historical circumstances of how these institutions were created will aid our understanding of how they function in modern times.

The origins of political order also demonstrate how genes matter and how patrimonialism characterized ancient societies from China to Europe. Fukuyama describes two principles of natural human sociability, namely: kin selection and reciprocal altruism. The principle of kin selection states that human beings act more altruistically towards genetic relatives than strangers. While the principle of reciprocal altruism says that people tend to develop relationship of mutual harm

or mutual benefit with other people through their interactions. To him, human beings by nature desire not just material things but also recognition, which is the foundation on which human politics revolves around.

The author explains that man is social by default, and not an isolated individual as described by Hobbes and Rousseau. Many chapters of the book are dedicated to understanding how each society gradually evolved into a state, their achievements, and shortcomings in understanding why some states seem to be democratic while others are autocratic states with democratic institutions.

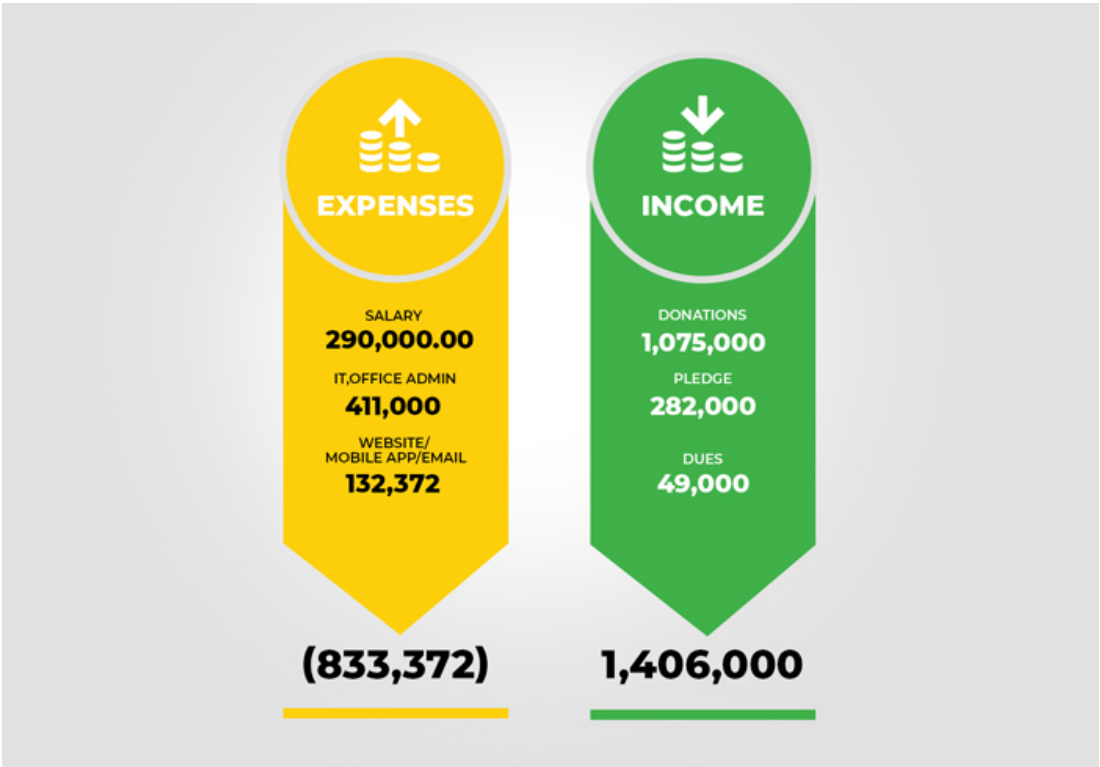

Fukuyama believes that political order is built on three institutions:

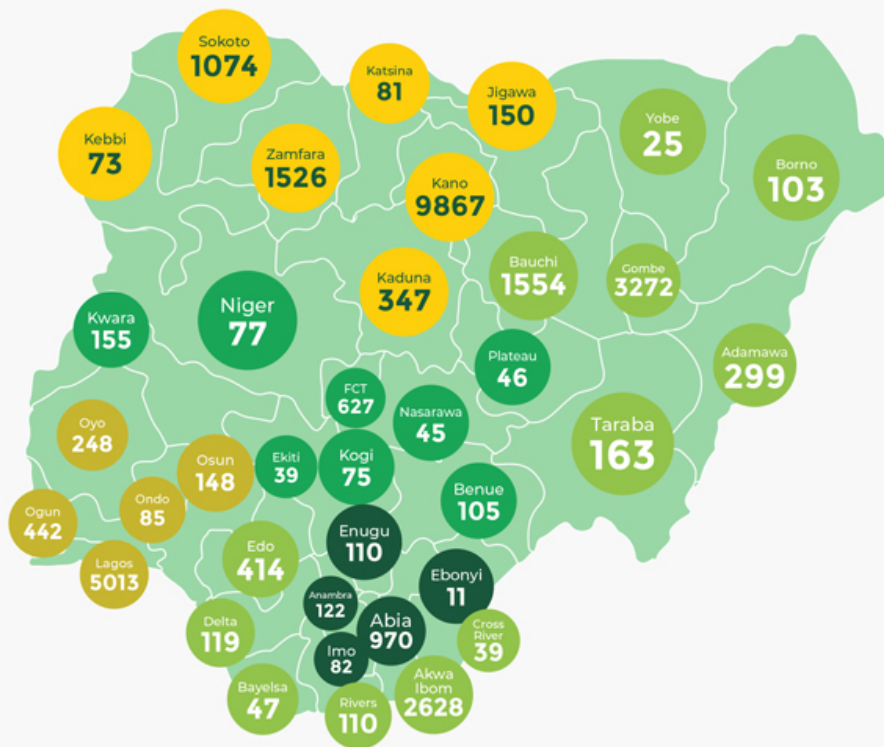

- A strong state
- The rule of law
- An accountable government

According to him, a successful liberal democracy must combine all three sets of institutions in a stable balance, which constitutes the miracle of modern politics and because it is difficult to achieve and maintain all three.
